JUST PUBLISHED: Peer Reviewed Study on China Biopharma; *New Advances in Biopharmaceutical Technology in China, 2nd ed.*

Rockville, MD, November, 2018 - Just released: *Advances in Biopharmaceutical Technology in China, 2nd ed.* is a peer-reviewed, ready reference for all aspects of biopharmaceuticals in China, including an understanding of the China biopharma current situation, and future opportunities. This is a must-read analysis of the state of biopharma in China.

The volume is published by BioPlan Associates, Inc., in cooperation with the Society for Industrial Microbiology and Biotechnology (SIMB). It provides a comprehensive overview of the biopharmaceutical industry, and the state of technology in China.

This reference's 1,100+ pages of data-rich analysis and comprehensive assessment of China's state-of-the-industry provides trends and analysis on the industry. It covers all types of organizations involved in biopharma in China, domestic, multinational, and government.

Coverage includes 55 chapters in 9 sections:

- Study Overview
- SECTION 1 Introduction to Advances in China Biopharmaceuticals
- SECTION 2 Innovation in China Biopharmaceuticals: Historical and Current Climate
- SECTION 3 Biopharmaceuticals and Healthcare Systems and Structure in China
- SECTION 4 Biopharmaceutical Manufacturing in China: Operational and Quality Trends
- SECTION 5 Advances in Biological Development in China
- SECTION 6 Vaccine Industry in China
- SECTION 7 Biopharma Contract Services and Clinical Trials in China
- SECTION 8 Doing Business in China: Investment and Intellectual Property
- SECTION 9 Future of China's Biopharma Industry
- Directory of Biologics on Market & Clinical Development in China
- Directory: Top 60 Biopharmaceutical Facilities in China

Society for Industrial Microbiology and Biotechnology: (SIMB) is a nonprofit, international association dedicated to the advancement of microbiological sciences, especially as they apply to industrial products, biotechnology, materials, and processes. Founded in 1949, SIMB promotes the exchange of scientific information through its meetings and publications, and serves as liaison among the specialized fields of microbiology. Membership in the Society is extended to all scientists and companies in the general field of microbiology.
