

An Invaluable Resource for
Trends & Analysis

China's Position in Global BioManufacturing

A Comparison of China's Emerging
Position vs Established Regions'
Manufacturing Capacity and
Production

An in-depth review of emerging trends and opportunities, with comparative, aggregated data from BioPlan's 19th Annual Report and Survey of Biopharmaceutical Manufacturing Capacity and Production, providing trend information and relevant new in-depth insights into the rapidly growing and changing Chinese biologics industry.

SPECIAL SEGMENTS: Industry Reviewers' Comments in *Analysis and Implications* Sections

"The BioPlan Annual Report and Survey is
the most comprehensive survey and result
analysis to determine trends,
requirements and new demand of the
biopharmaceutical industry.

China's Position in Global Bioprocessing

- Reviewed by Industry Experts
- Subject Matter Expert analysis
- 57 Pages
- 14 Segments covered
- Key Graphs and Tables

COVERAGE

- Single Key Biomanufacturing Trend of 2022
- Average Cost for Primary Recombinant Protein
- Titer Ranges for mAbs at Various Production Scales
- Current Percent of Total Capacity for Facility Operation
- Capacity Constraints Today
- Downstream Bioprocessing Steps Creating Overall Capacity Constraints
- Important Areas to Avoid Significant Capacity Constraints
- Budget and Funding Percentage Changes over the Next 12 Months
- Actions to Reduce Overall Bioprocessing Costs During Past 12 Months
- Single-use/Disposable Biomanufacturing Systems
- Change in Spending on Outsourcing for Manufacturing Next 12 Months
- And More!
